

HW01 – QA/QC Jobs · 20 Defects · Test a Physical Product

Họ và tên: Ngô Thế Đạt

Mã số sinh viên (StudentID): 23127340

Link GitHub Repository: [Link đến repo chứa lịch sử commit và bài làm của bạn] [2]

Link YouTube (Playlist/Videos): [Link Unlisted chứa >= 5 video demo] [3]

Requirement 1 – QA/QC Job Market 2026+

Lưu ý: Bạn cần liệt kê 10 tin tuyển dụng (đăng trong vòng 60 ngày), trong đó bắt buộc >= 3 vị trí yêu cầu kỹ năng AI/LLM/automation-AI [4].

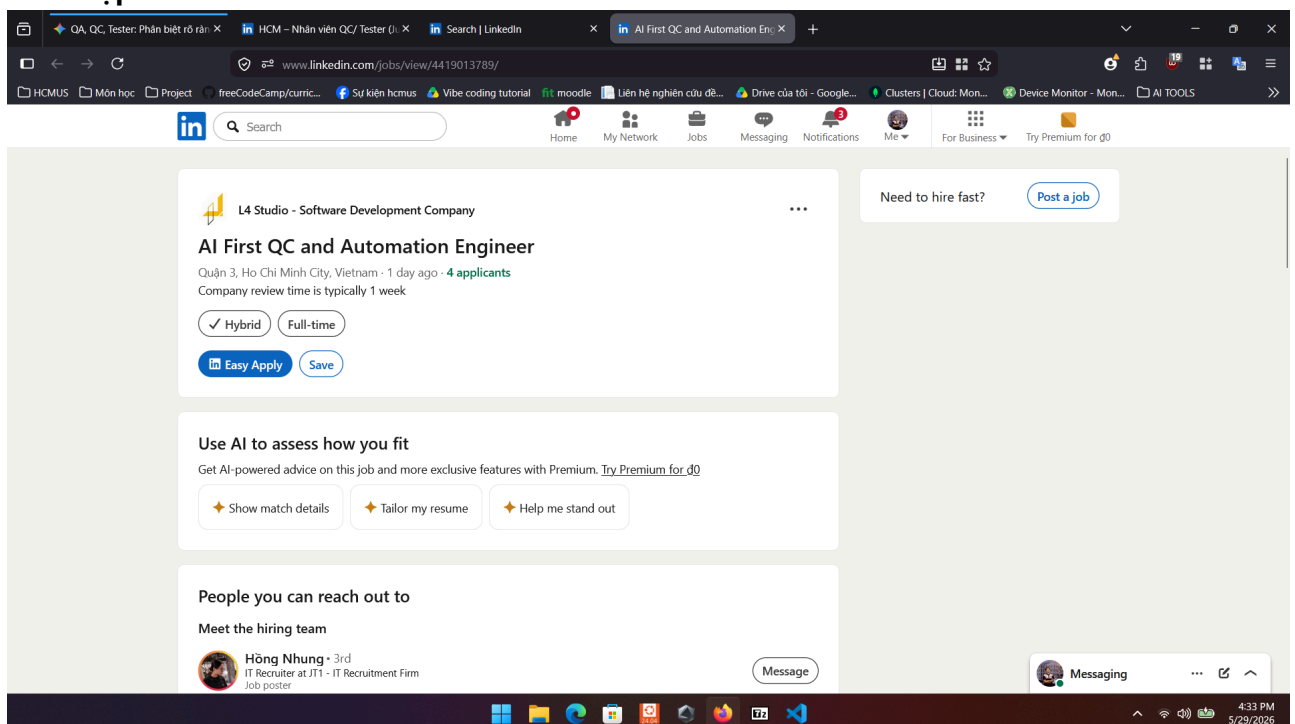

1.1 Sơ đồ tư duy (Mindmap) vai trò QA/QC

- **Ảnh Sơ đồ/Markdown:** [Chèn ảnh PNG hoặc Markdown mindmap do AI tạo] [5]
- **3 lỗi sai tìm thấy:**
 1. [Lỗi 1]
 2. [Lỗi 2]
 3. [Lỗi 3] [6]

1.2 Danh sách 10 công việc QA/QC

Job 1: AI First QC and Automation Engineer(L4 Studio - Software Development Company) - [Có yêu cầu AI]

- **Link:** <https://www.linkedin.com/jobs/view/4419013789/>
- **Ảnh chụp màn hình:**

- **Mô tả công việc (Job Description):**

- This is a unique and rare opportunity for elite enterprise software practitioners who want to define the future of global enterprise applications. The company is creating an AI-first engineering centre in Ho Chi Minh City as a flagship centre for building mission-critical platforms, modernising complex legacy systems, and pioneering AI-augmented development at scale.
- You'll join the foundational engineering squad working on a large, global platform (40,000+ users) across travel, events, workforce, payments and operations, re-architected into .NET 8 microservices, event-driven Azure, React 18, and an AI-ready data foundation. This is an R&D-driven, product-first environment where engineers think in systems; design with AI as a core component, and help set the technical standards and culture for a design, development and engineering centre that will become a defining reference point for enterprise software worldwide.
- **Mission:** Ensure quality, reliability, and scalability of mission-critical enterprise platforms through modern automation-first testing practices embedded within an AI-augmented engineering environment.
- **Key Responsibilities:**
 - Design and implement automated test frameworks for microservices and frontend applications
 - Develop API, integration, and end-to-end automated test suites
 - Embed quality practices within CI/CD pipelines
 - Define and enforce test strategies across services (unit, integration, regression)
 - Collaborate with engineers to shift-left quality practices
 - Ensure performance, reliability, and scalability through automated validation
 - Contribute to observability and monitoring of production systems
 - Leverage AI-assisted tools to improve test coverage and efficiency
 - Participate in architecture and design discussions with a quality-first mindset

- **Kỹ năng yêu cầu (Required Skills):**

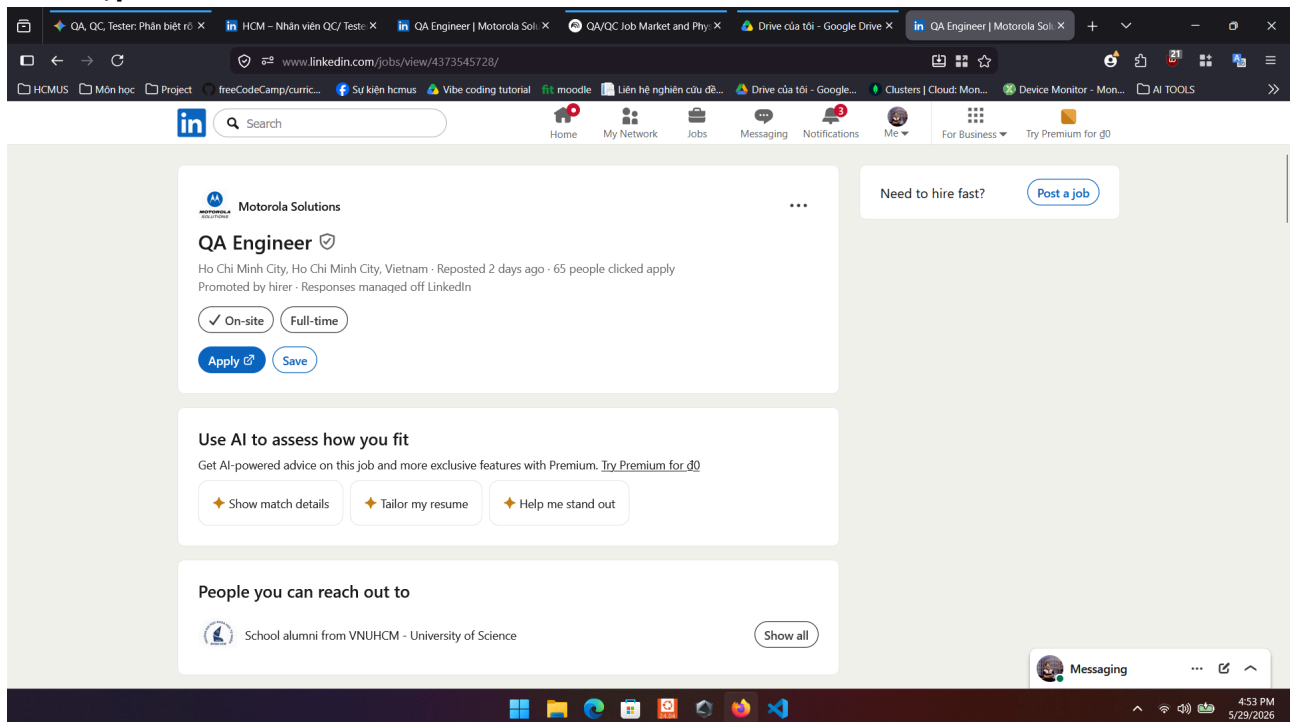

- **Core Requirements:**
 - 7+ years experience in QA / Automation Engineering
 - Strong experience with test automation tools (e.g., Selenium, Playwright, Cypress, or similar)
 - Strong experience in test case creation, management, and execution
 - Experience testing APIs and microservices architectures
 - Proficiency in at least one programming language (C#, JavaScript, or Python)
 - Experience with CI/CD pipelines and test integration
 - Experience with Claude Code, LLM models, or AI-assisted testing workflows
 - Understanding of distributed systems and event-driven architecture
 - Strong analytical and problem-solving skills
 - Good English communication skills and ability to work with cross-functional teams
- **Bonus Skills:**
 - Experience with performance testing
 - Experience working with Azure environments
 - Experience with fuzzy logic testing or non-deterministic system validation
 - Knowledge of contract testing
 - Experience in AI-assisted testing or intelligent test generation

- Exposure to observability tools and production monitoring

- **Mức lương (Salary):** 70,000,000 VNĐ/tháng gross
- **AI Impact Analysis (1-2 câu):** AI được xếp vào mục bonus skills, cho thấy đây là một kỹ năng bổ trợ có thể giúp tăng hiệu quả công việc nhưng không phải là yêu cầu bắt buộc. Điều này phản ánh thực tế rằng trong năm 2026, nhiều công việc QA/QC vẫn sẽ yêu cầu kỹ năng truyền thống, nhưng có thêm lợi thế nếu ứng viên có khả năng sử dụng AI để cải thiện quy trình kiểm thử.

Job 2: QA Engineer (Motorola Solutions) - [Có yêu cầu AI]

- **Link:** <https://www.linkedin.com/jobs/view/4373545728/>
- **Ảnh chụp màn hình:**

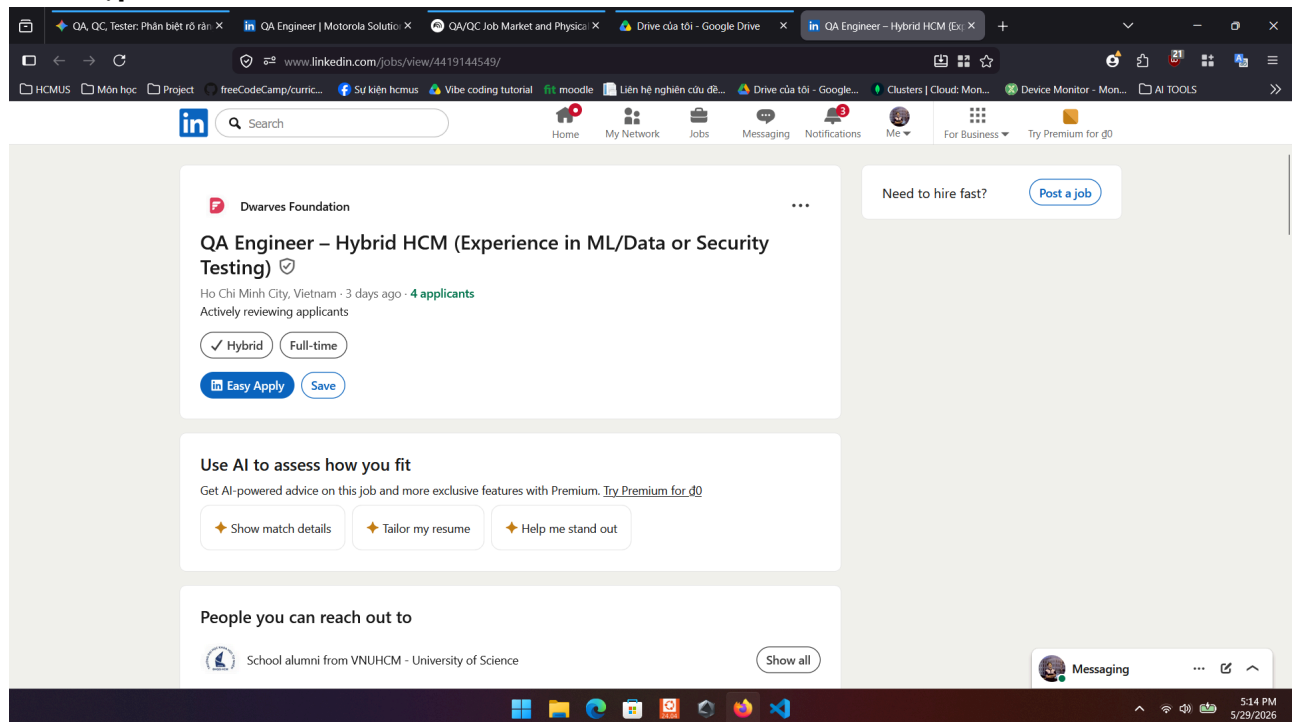

- **Mô tả công việc (Job Description):**
 - We are seeking a diligent and detail-oriented QA Engineer to join our R&D team. The successful candidate will be responsible for ensuring the quality and reliability of our model and core engines.
 - You will play a key role in building testing infrastructure, benchmarking models, and defining complex data scenarios to predict how model performance impacts the final product.
- **Kỹ năng yêu cầu (Required Skills):**
 - Minimum 3 years in Software Quality Engineering or Backend Development, with a focus on automation.
 - Bachelor's degree in Computer Science, Machine Engineering, or a related technical field.
 - Proficient in Python (for automation & ML scripting) and C++ or JavaScript (for engine-level or web-integrated testing).
 - Solid understanding of AI/ML lifecycles and Computer Vision fundamentals.
 - Hands-on experience with cloud platforms (AWS, Azure, or GCP) and IoT/Robotics environments.

- Ability to calculate and interpret core metrics (mAP, Precision/Recall, F1-score, etc.) to assess model performance beyond simple "pass/fail" results.
- Proficiency with Git, Jira, TestRail, and modern CI/CD tools (Jenkins, GitLab CI, or GitHub Actions).
- **Mức lương (Salary):** Thương lượng
- **AI Impact Analysis (1-2 câu):** [Phân tích tác động của AI đến công việc này] [4]

Job 3: QA Engineer – Hybrid HCM (Experience in ML/Data or Security Testing) (Dwarves Foundation) - [Có yêu cầu AI]

- **Link:** <https://www.linkedin.com/jobs/view/4419144549/>

- **Ảnh chụp màn hình:**

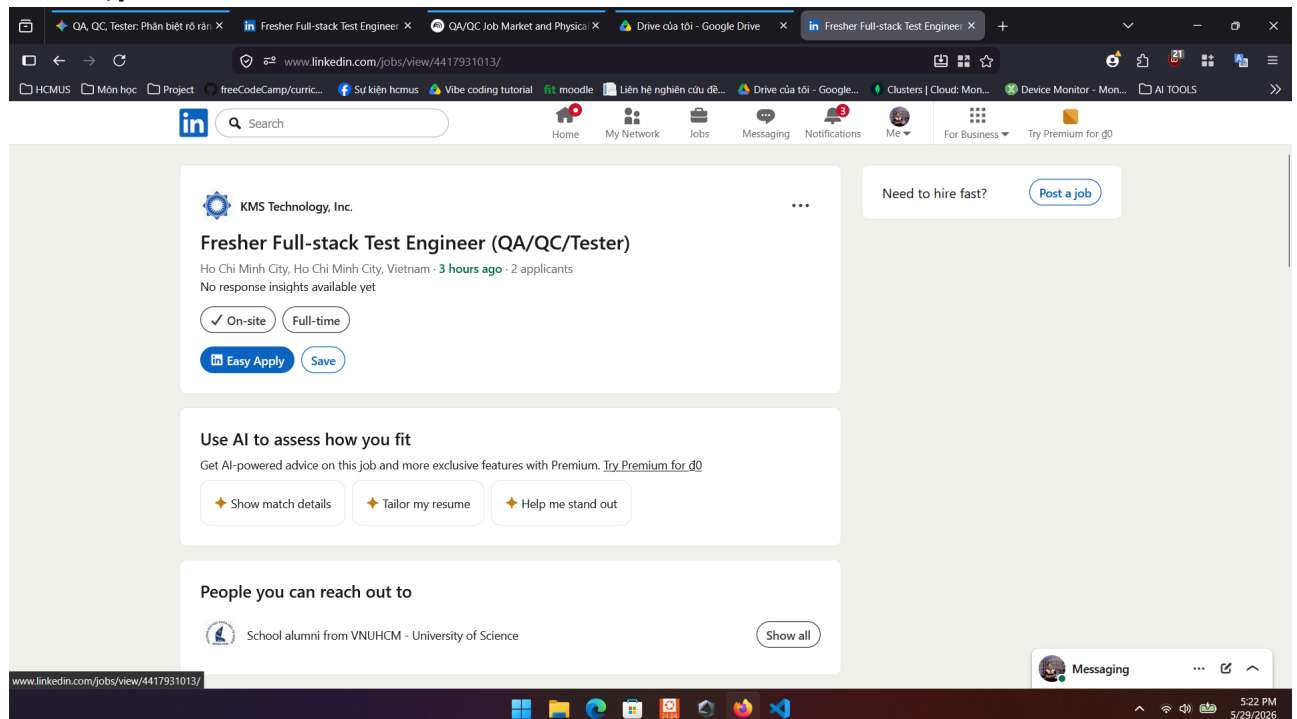

- **Mô tả công việc (Job Description):**
 - **About the Role:** This role focuses on automation testing across API, backend, and UI, with additional scope in ML features, security/authentication testing, and API partnerships/integration with client interactions
 - **Responsibilities:**
 - Design, develop, and maintain automated test frameworks for API, backend, and UI layers
 - Implement and execute automated test scripts to ensure product quality and reliability
 - Collaborate closely with Engineering, Product, and DevOps teams throughout the SDLC
 - Apply Shift-Left Testing practices to identify defects early
 - Integrate automated tests into CI/CD pipelines
 - Perform test planning, execution, and defect tracking
 - Analyze test results and provide clear quality insights and recommendations
 - Contribute to testing standards, best practices, and continuous improvement initiatives
 - Support junior QEs through technical guidance and knowledge sharing
 - Participate in code reviews and quality discussions

- **Additional Responsibilities:**
 - Validate Machine Learning (ML) related features and data outputs
 - Perform testing related to security, authentication, and authorization mechanisms
 - Test and validate API partnerships and third-party integrations with client systems
 - Ensure reliability and security of client-facing API interactions
- **Kỹ năng yêu cầu (Required Skills):**
 - 5+ years of experience in Quality Control / Test Automation
 - Strong experience in automated testing across API, backend, and UI
 - Hands-on experience with Playwright, Cypress, RestAssured, Postman
 - Proficiency in one or more programming languages: Golang, TypeScript, Ruby, Python, or Java
 - Solid understanding of software testing methodologies and SDLC
 - Experience integrating automated tests into CI/CD pipelines
 - Familiarity with Docker and containerized test environments
 - Strong analytical and communication skills
 - Good English communication skills
- **Mức lương (Salary):** \$1,800 – \$2,000
- **AI Impact Analysis (1-2 câu):** [Phân tích tác động của AI đến công việc này] [4]

Job 4: Fresher Full-stack Test Engineer (QA/QC/Tester) (KMS Technology, Inc) - [Có yêu cầu AI]

- **Link:** <https://www.linkedin.com/jobs/view/4417931013/>
- **Ảnh chụp màn hình:**

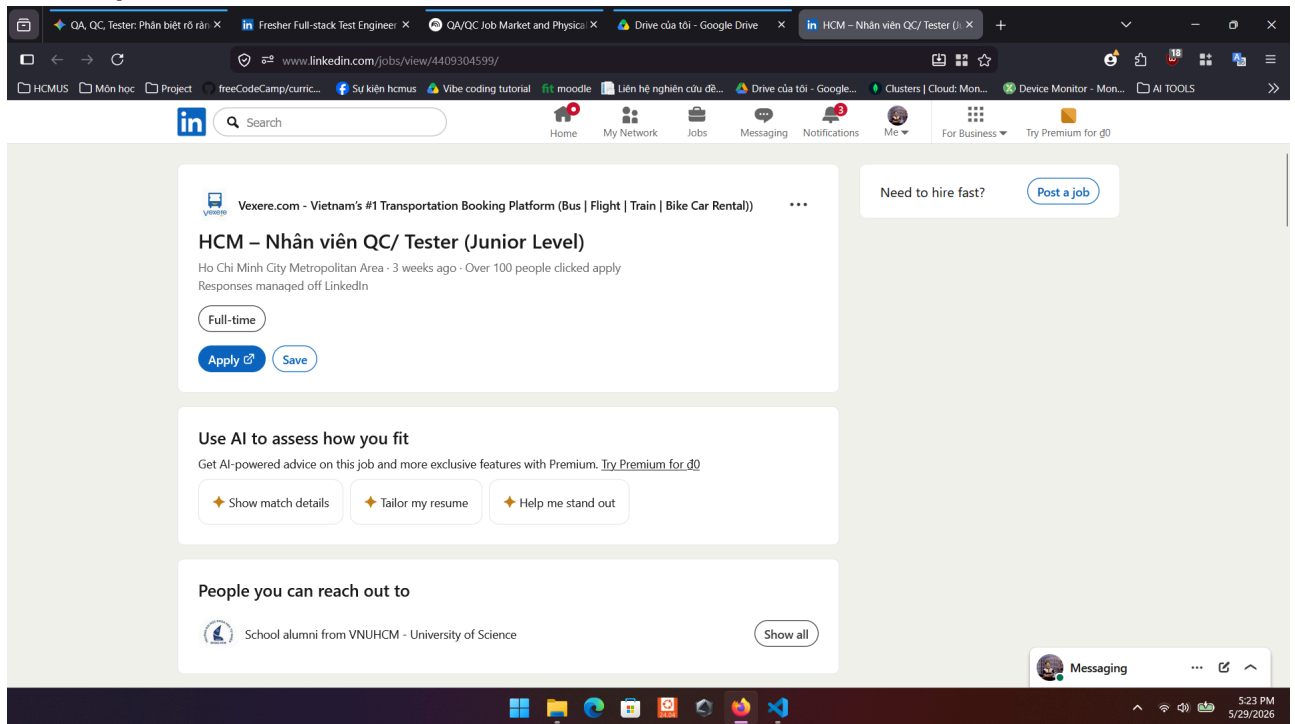

- **Mô tả công việc (Job Description):**
 - **Your Key Responsibilities:**

- Develop a strong understanding of domain knowledge and client testing processes to execute testing activities effectively.
 - Work closely with the project team on daily tasks and participate in sprint demo meetings with clients.
 - Develop, maintain, and execute test cases/test scripts.
 - Identify, report, track, and monitor defects using the defect tracking system.
 - Prepare and review test documentation to ensure accuracy and completeness.
 - Address issues related to testing quality and suggest improvements.
 - Communicate test progress, results, and quality risks both internally and directly with the client.
- **Kỹ năng yêu cầu (Required Skills):**
 - **General Requirements:**
 - 4th-year student or recent graduate with a Bachelor's degree in Information Technology, Computer Science, Software Engineering, or a related field, with less than one (01) year of experience.
 - Strong IT background with a GPA of 7.5+ (Please attach transcripts when submitting your CV).
 - Upper-intermediate or higher English proficiency (both written and verbal).
 - Minimum 3-month internship experience in software testing, automation testing, or a related field is a plus.
 - Strong self-learning ability with a proactive, growth-oriented mindset.
 - Excellent analytical and problem-solving skills.
 - Ability to work independently and collaborate effectively in a team.
 - **Technical Requirements:**
 - Solid understanding of software testing concepts and methodologies, including manual, automation, integration, unit, and API testing.
 - Solid programming skills in Python / Java / JavaScript, or other relevant languages.
 - Familiarity with testing tools (e.g., Selenium, Katalon, Playwright, Appium, JUnit), as well as tools for API testing (e.g., Postman), is a plus.
 - **Nice to Have:**
 - Experience using AI chat tools (ChatGPT, Claude, Gemini, etc.) for research, debugging, and learning
 - Familiarity with at least one AI coding assistant (GitHub Copilot, Cursor, Claude Code, or similar)
 - Ability to write clear, contextual prompts to generate code snippets, unit tests, or documentation
 - Awareness of AI output limitations and responsible AI use (data privacy, handling of sensitive client data)
 - **Mức lương (Salary):** Thương lượng
 - **AI Impact Analysis (1-2 câu):** [Phân tích tác động của AI đến công việc này] [4]
-

Job 5: HCM – Nhân viên QC/ Tester (Junior Level) (Vexere) - [Không yêu cầu AI]

- **Link:** <https://www.linkedin.com/jobs/view/4409304599/>

- **Ảnh chụp màn hình:**

- **Mô tả công việc (Job Description):**

- **Responsibilities:**

- Analyze and review requirements, plan testing for platform features and system integration.
 - Write test cases/test designs, create test cycles, and manage them on the system.
 - Conduct API testing, workflow, automated jobs, and background processes.
 - Test interfaces, dashboard pages, and UI configurations.
 - Collaborate with the PO to understand business requirements and confirm completion criteria.
 - Log bugs, verify and manage bugs, and track the progress of bug fixes and verifications.
 - Propose improvements to the testing process, test coverage, and quality reporting.
 - Support the review of business documents, providing feedback from a testing perspective.
 - Receive feedback, check, and address customer feedback.
 - Write automation scripts using Cypress, Playwright to accelerate the testing process.
 - Perform tasks assigned by the team and leader.

- **Kỹ năng yêu cầu (Required Skills):**

- **Experience & Certifications:**

- 1-3 years of experience
 - Holds a testing certification (ISTQB, QA Foundation, or relevant courses).

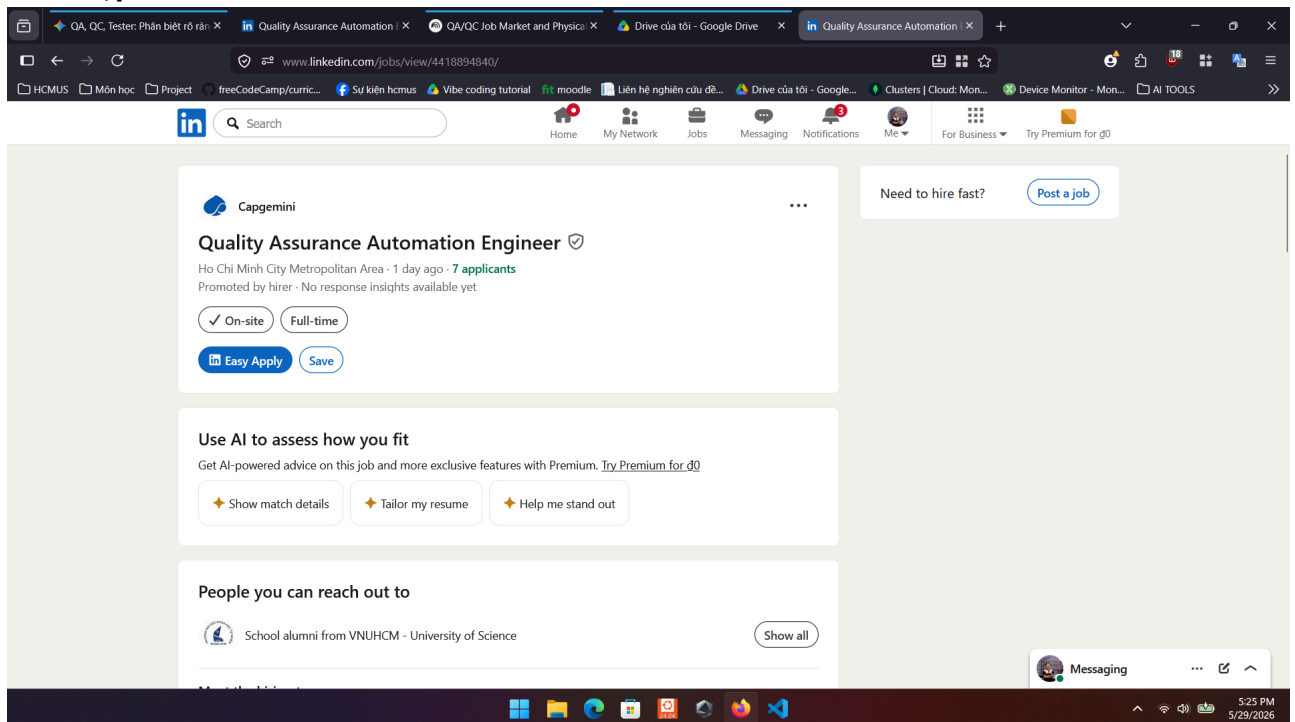

- **Core Skills:**

- Writes clear, systematic test cases and test plans, with good logical thinking.
 - Conducts API testing, workflow testing, and automation platform testing. Possesses good testing mindset.
 - Familiar with automation testing tools (Cypress, Selenium, Playwright, etc.).
 - Communicates well with PO and Dev, proactively asks questions and provides feedback.
 - Manages time effectively, prioritizes tasks, and performs well under pressure.

- Basic English skills.
- **Preferred:**
 - Experience in testing platforms, data pipelines, or workflow integration.
 - Proactive, responsible, eager to learn and improve.
- **Mức lương (Salary):** Thương lượng
- **AI Impact Analysis (1-2 câu):** [Phân tích tác động của AI đến công việc này] [4]

Job 6: Quality Assurance Automation Engineer (Capgemini) - [Có yêu cầu AI]

- **Link:** <https://www.linkedin.com/jobs/view/4418894840/>
- **Ảnh chụp màn hình:**

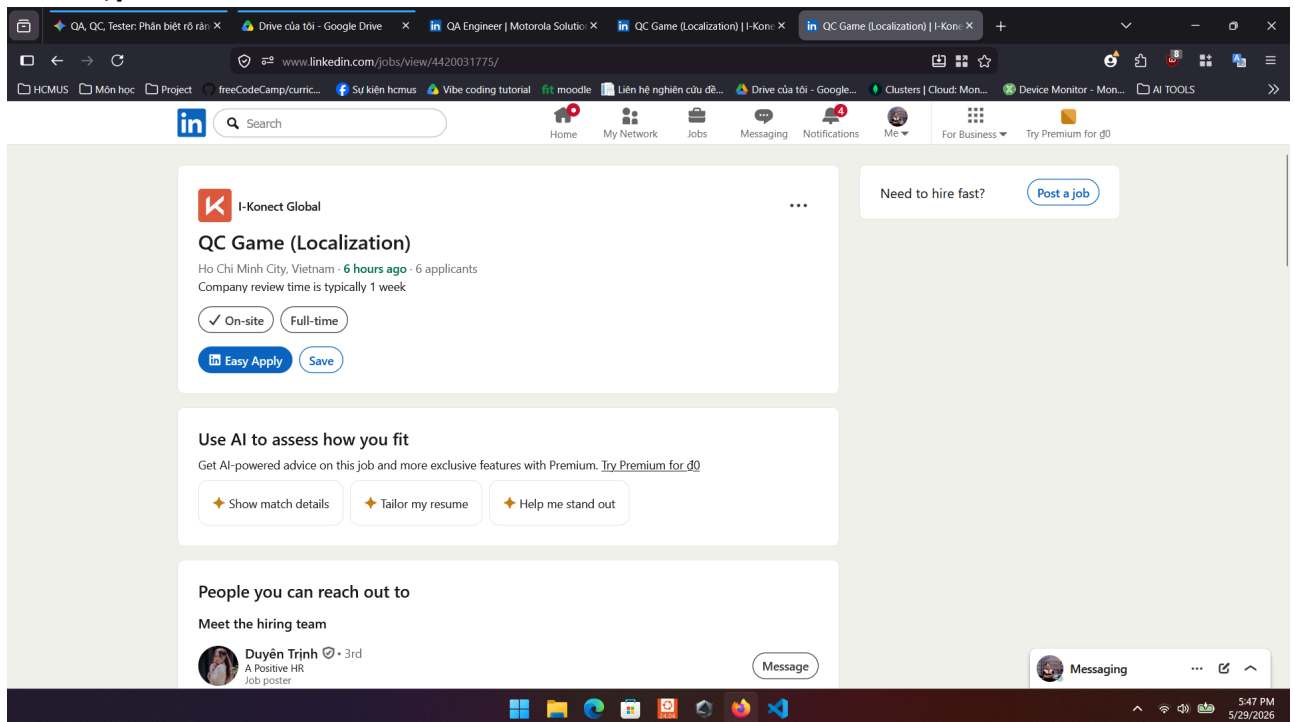

- **Mô tả công việc (Job Description):**
 - **Key Responsibilities:**
 - Design and maintain System Test strategy, scenarios, and automation for microservices.
 - Implement and execute System Tests on CI/CD pipelines (Harness/Jenkins) integrated with NEF.
 - Develop and maintain test automation frameworks.
 - Create, maintain, and verify mocks/stubs (WireMock) to simulate upstream/downstream dependencies.
 - Collaborate closely with Developers, QEs, and BAs to validate system behavior and resolve integration issues.
 - Monitor and analyze System Test execution results, logs, and metrics to identify root causes and trends.
 - Maintain test artefacts (test cases, runbooks, reports) and ensure alignment with platform standards.
 - Support knowledge sharing across team members.

- Promote and apply shift-left testing strategies throughout the development lifecycle.
- **Kỹ năng yêu cầu (Required Skills):**
 - **Your Skills and Experience:**
 - 2–4 years' experience as a QE or Automation Engineer, preferably in microservice-based systems.
 - Hands-on experience with System Test or Integration Test in CI/CD pipelines.
 - Strong knowledge of automation tools (Java / TypeScript / Playwright / REST Assured).
 - Familiarity with WireMock, contract testing, or similar mock/stub frameworks.
 - Experience with API and event-driven testing (Kafka / MQ / REST).
 - Understanding of CI/CD tools (Jenkins, Harness) and source control (Git).
 - Strong communication skills and ability to work with cross-region teams (Vietnam, India, Australia).
 - **Nice to Have:**
 - Experience in Banking platforms.
 - Familiarity with Amazon Q, AI-driven test generation, or automated prompt execution.
- **Mức lương (Salary):** Thương lượng
- **AI Impact Analysis (1-2 câu):** [Phân tích tác động của AI đến công việc này] [4]

Job 7: QC Game (Localization) (I-Konect Global) - [Không yêu cầu AI]

- **Link:** <https://www.linkedin.com/jobs/view/4420031775/>
- **Ảnh chụp màn hình:**

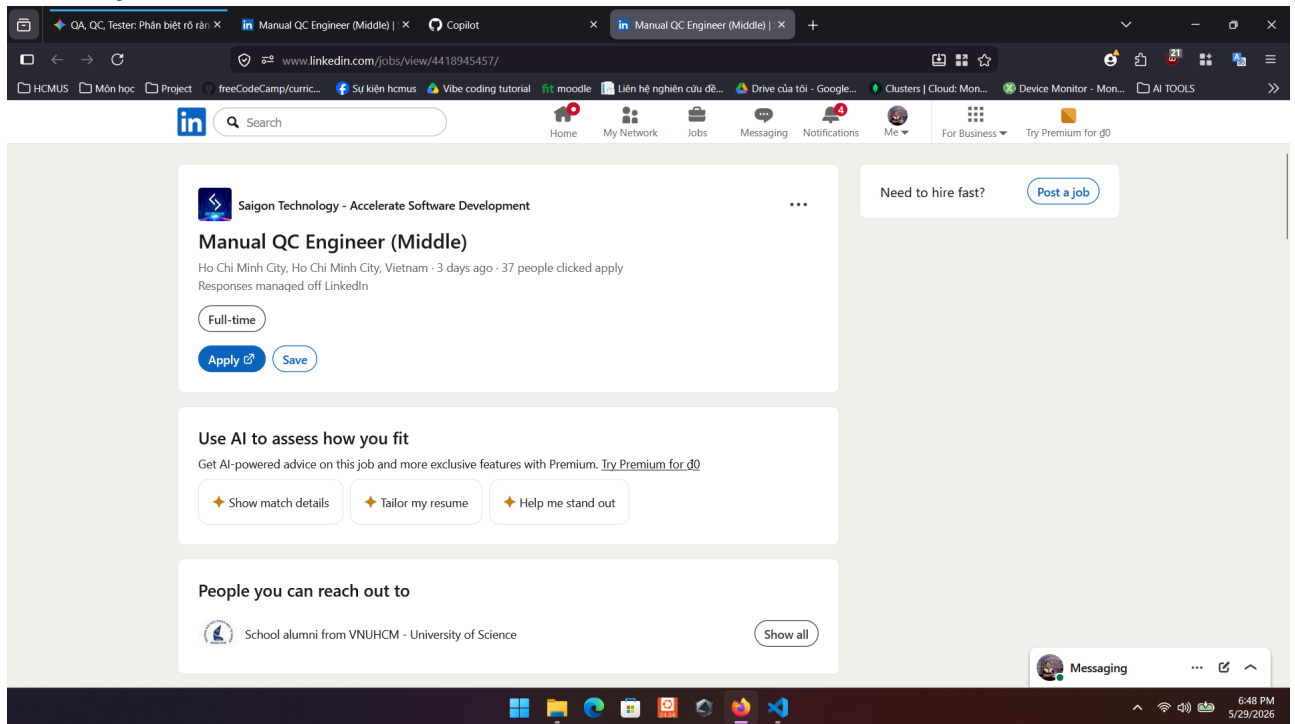

- **Mô tả công việc (Job Description):**
 - **Job Details:**
 - Location: Binh Thanh

- Level: Jun-Mid
 - Interview process: Technical Interview → HR Interview
 - **Key Responsibilities:**
 - Test our online products, look for problems and accurately report errors through our databases to ensure superior quality before release.
 - Log, track, regress, and close bugs in our tracking system.
 - Communicate with Leads with status updates.
 - Daily communicate with development and cross-functional teams.
 - Work with build and release to ensure stability and functionality.
 - Identify areas of improvement, track any changes and status updates for current builds.
 - Experience in developing test cases, test plans, and execution tests (functional testing, non-functional testing)
 - Read and understand the description document
 - Identify issues, including functional bugs, logic errors, graphics, audio, gameplay feel, and game flow.
 - Undertake additional tasks as assigned by leader
 - **Kỹ năng yêu cầu (Required Skills):**
 - **Must Have Skills And Experience:**
 - Able to work effectively both independently and as part of a team.
 - Graduated in Information Technology, Software Engineering, or related fields, Testing course.
 - Passionate about gaming, with a desire to pursue a career as a Manual Game QC.
 - Quick to learn, eager to acquire new knowledge, and hardworking.
 - Available to start immediately.
 - At least 6 months of software testing experience (Manual) for fresher level and 3+ years of software testing experience for Junior.
 - **Preferred If Candidate Have:**
 - English is a plus.
 - Enthusiasm and knowledge of the online game industry.
 - **Mức lương (Salary):** Thương lượng
 - **AI Impact Analysis (1-2 câu):** [Phân tích tác động của AI đến công việc này] [4]
-

Job 8: QA Lead (NAKIVO) - [Có/Không yêu cầu AI]

- **Link:** <https://www.linkedin.com/jobs/view/4417859749/>

- **Ảnh chụp màn hình:**

- **Mô tả công việc (Job Description):**

- **1. Quality Ownership:**
 - Own release quality for your product/team
 - Define testing scope based on risk, timelines, and business priorities
 - Ensure only production-ready features are released
 - Participate actively in planning, requirement reviews, and release discussions
 - Identify quality risks early and drive mitigation plans
- **2. Team Leadership:**
 - Lead and mentor QA engineers across manual and automation testing
 - Create a strong culture of accountability, ownership, and continuous improvement
 - Improve team efficiency and execution quality
- **3. Testing & Automation:**
 - Define and improve regression strategies
 - Drive automation for UI, API, and integration testing
 - Improve CI/CD quality workflows and release confidence
 - Optimize test execution time while maintaining meaningful coverage
 - Support exploratory, risk-based, and customer-focused testing approaches
- **4. Customer & Product Focus:**
 - Work closely with Product, DEV, and Support teams
 - Analyze production defects and customer feedback to improve test coverage
 - Drive root-cause analysis and defect prevention practices
 - Focus on customer-perceived quality, not only internal QA metrics
- **5. Process & Continuous Improvement:**
 - Help establish practical QA processes that teams actually follow
 - Track quality KPIs and testing effectiveness
 - Improve release readiness, test planning, and defect management
 - Introduce AI-assisted QA workflows where they provide real value

- **Kỹ năng yêu cầu (Required Skills):**

- **Required Qualifications:**

- Good communication skills in English
 - 6+ years of experience in software testing / quality engineering
 - 3+ years leading QA teams or acting as QA Lead
 - **Strong hands-on experience with:**
 - Test automation
 - Designing test matrices across multiple OS versions, hardware configurations, and storage targets
 - Regression strategy
 - Experience reviewing requirements and identifying testing risks early
 - Strong troubleshooting and analytical skills
 - Experience mentoring junior and mid-level QA engineers
 - Comfortable working in fast-moving environments with evolving priorities

- **Desired Qualifications:**

- Hands-on testing experience with backup/recovery products
 - Experience with cloud platforms, backup/storage products, virtualization, or infrastructure-related software
 - Experience improving release quality and reducing defect leakage
 - Experience using AI tools (ChatGPT, Copilot, Cursor, Claude, etc.) to improve QA workflows
 - Experience building automation frameworks or improving testing architecture

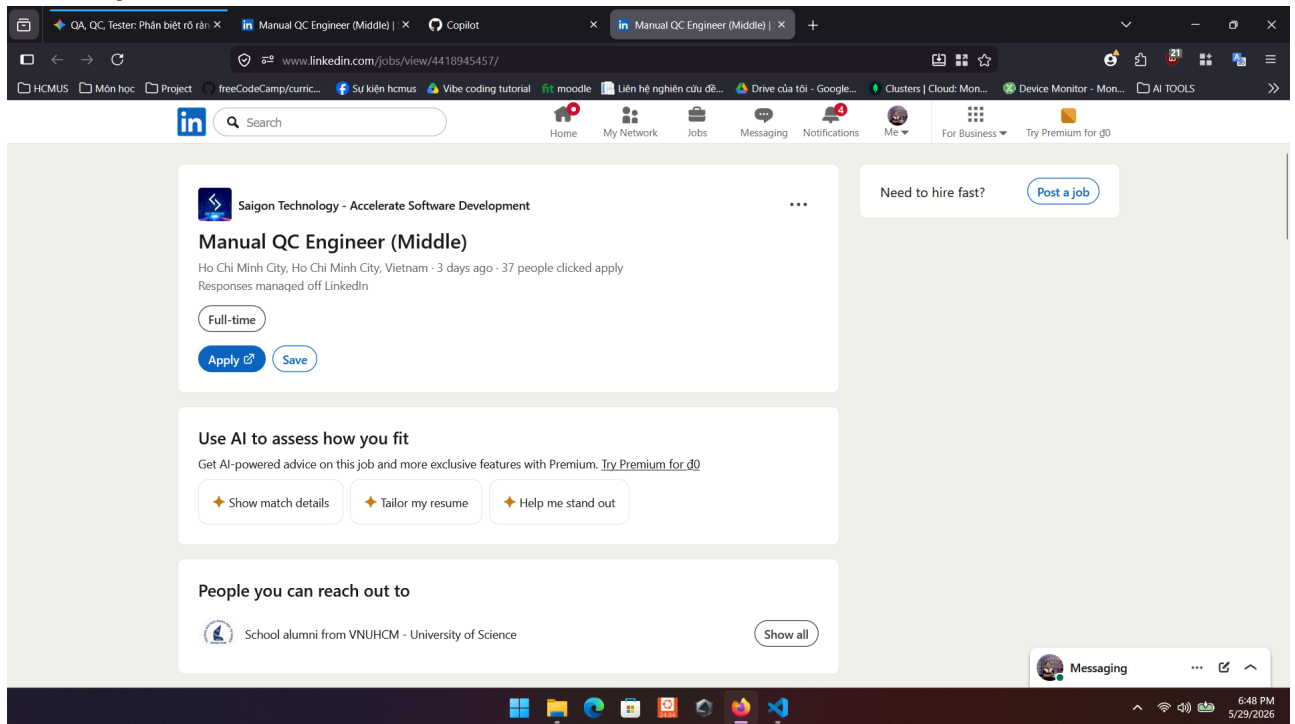

- **Mức lương (Salary):** [To be filled]

- **AI Impact Analysis (1-2 câu):** [Phân tích tác động của AI đến công việc này] [4]

Job 9: Manual QC Engineer (Middle) (Saigon Technology)[Có/Không yêu cầu AI]

- **Link:** <https://www.linkedin.com/jobs/view/4418945457/>

- **Ảnh chụp màn hình:**

- **Mô tả công việc (Job Description):**

- Communicate to project stakeholders (managers, client and team) to analyse, clarify requirements
- Develop test plan for the system
- Define test cases or develop automation scripts for assigned features
- Execute test process with created test cases on assigned features
- Create reports with details on found issues
- Contribute ideas to optimize working processes

- **Kỹ năng yêu cầu (Required Skills):**

- **Must Have:**
 - At least 3 years of experience in web and mobile app testing
 - Having solid knowledge of test cases design techniques and testing strategies
 - Experience API test with Postman scripts
 - Good at English communication
- **Nice to Have:**
 - Experience in using SQL
 - Experience in performance testing
 - Experience in automation testing (Selenium, Playwright)

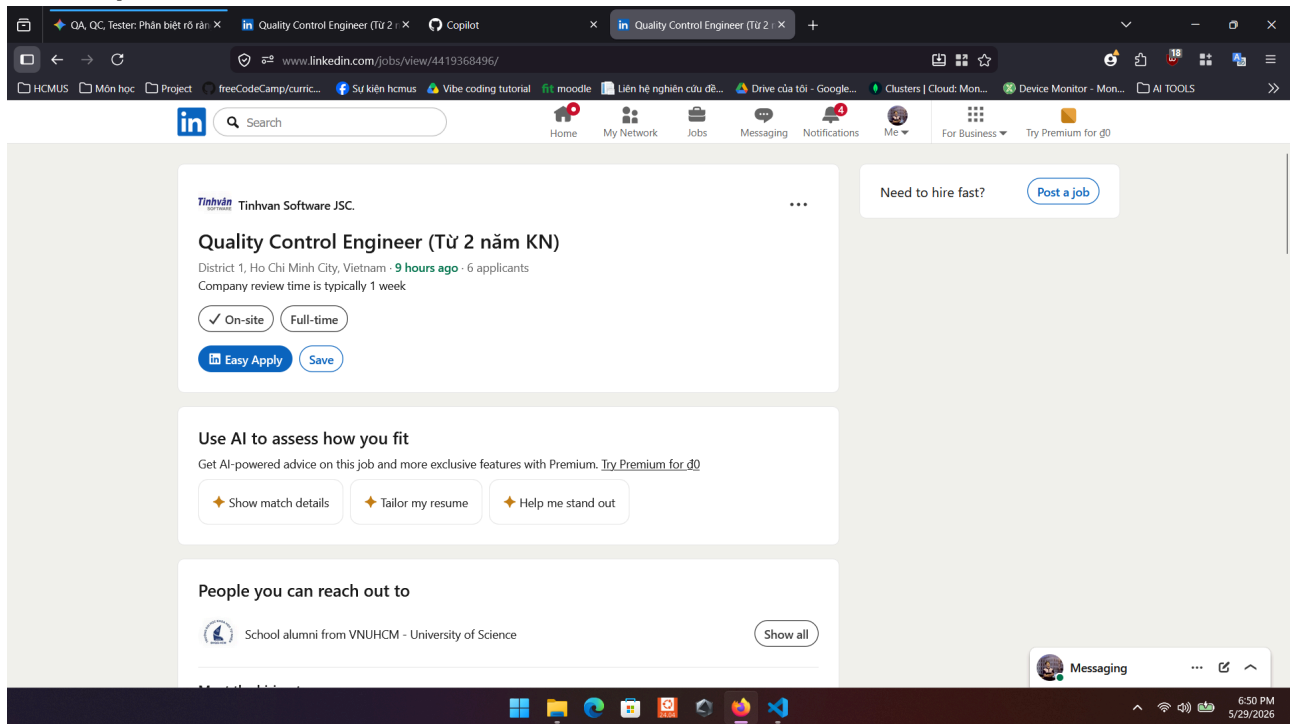

- **Mức lương (Salary):** Thương lượng

- **AI Impact Analysis (1-2 câu):** [Phân tích tác động của AI đến công việc này] [4]

Job 10: Quality Control Engineer (Từ 2 năm KN) (Tinhvan Software JSC)[Có/Không yêu cầu AI]

- **Link:** <https://www.linkedin.com/jobs/view/4419368496/>

- **Ảnh chụp màn hình:**

- **Mô tả công việc (Job Description):**

Tham gia vào dự án test các dự án về hệ thống với vai trò Tester

Chịu trách nhiệm về kiểm soát chất lượng các sản phẩm của Công ty trước khi bàn giao cho khách hàng.

Hiểu rõ các yêu cầu chức năng của các sản phẩm của Công ty

- **Kỹ năng yêu cầu (Required Skills):**

- Tối thiểu 2 năm KN test manual
- Nắm rõ quy trình kiểm thử, kỹ thuật kiểm thử và các loại kiểm thử, quản lý bug
- Lập và quản lý kế hoạch kiểm thử, kịch bản kiểm thử
- Có khả năng phân tích những requirement phức tạp, biết cách áp dụng các kỹ thuật viết test case để đảm bảo test cases cover được hết các yêu cầu của tài liệu
- Có khả năng tổng hợp, report kết quả test. Có khả năng phân tích, nhận định được rủi ro của dự án
- Biết sử dụng Jira, Confluence/Wiki, Sharepoint, Excel
- Có kỹ năng giải quyết vấn đề, hợp tác và giao tiếp tốt
- Chủ động, cởi mở, học hỏi nhanh, có khả năng làm việc nhóm
- Khả năng thích ứng tốt với việc thay đổi project, tìm hiểu và học hỏi nhanh chóng cho dự án mới

- **Mức lương (Salary):** 18-21 triệu/tháng + phụ cấp onsite

- **AI Impact Analysis (1-2 câu):** [Phân tích tác động của AI đến công việc này] [4]

Requirement 2 – 20 Software Defects 2022–2026

Lưu ý: Liệt kê 20 lỗi phần mềm (2022-2026), trong đó ≥ 5 lỗi liên quan đến AI/LLM. Với MỖI lỗi trong số 20 lỗi, bạn phải tìm 1 điểm AI bị thiên kiến (bias) hoặc bịa đặt (hallucinate) khi giải thích lỗi đó [7, 8].

(Lập lại mẫu dưới đây cho đủ 20 lỗi)

Defect 1: [Tên lỗi phần mềm] - [Liên quan AI / Không liên quan AI]

- **Source link:** [...] [7]
- **Mô tả (Description):** [...]
- **Mức độ nghiêm trọng (Severity):** [...]
- **Hậu quả (Consequences):** [...]
- **Giải pháp (Solution):** [...] [7]
- **AI Bias/Hallucination:** [Giải thích 1 điểm AI bịa đặt hoặc thiên kiến khi bạn yêu cầu AI giải thích về lỗi này] [7, 8]

Requirement 3 – Test cases for ONE physical product

3.1 Thông tin thiết bị vật lý

- **Loại thiết bị:** [Ví dụ: Quạt, máy lọc nước, nồi cơm điện...] [8]
- **Thương hiệu:** [...]
- **Mẫu mã (Model):** [...]
- **Năm sản xuất:** [...]
- **Số Serial:** [Nhớ che đi 4 ký tự ở giữa, ví dụ: 1234****90] [8]
- **Minh chứng:** [Chèn ảnh chụp thiết bị thật đặt chung khung hình với Thẻ sinh viên của bạn] [8, 9]

3.2 Bảng Test Cases (15 Test Cases)

Lưu ý: Bạn có thể làm chi tiết trên file Excel rồi copy bảng tóm tắt vào đây. Phải có >= 3 test cases là edge cases (trường hợp biên) mà AI bỏ sót [1, 8, 10, 11].

ID	Objective	Input	Steps	Expected	Actual	Verdict	Ghi chú
TC01	...	...	...	...	...	...	...
...	...	...	...	...	...	...	...
TC15	...	...	...	...	...	...	...

Phân tích Edge Cases bị AI bỏ sót (Tối thiểu 3 TC):

- **Ảnh chụp màn hình chat AI:** [Chứng minh AI không tạo ra các test case biên này] [10]
- **Giải thích:** [Giải thích vì sao AI lại bỏ sót những trường hợp này] [10]

3.3 Báo cáo Lỗi (Defects Logged in GitHub Issues)

- **Minh chứng báo cáo lỗi:** [Chụp ảnh màn hình trang Issues trên GitHub repo của bạn, đảm bảo hiển thị rõ username GitHub và danh sách các lỗi bạn đã tìm thấy khi chạy 5/15 test cases trên thiết bị thật] [3, 12]

4. AI Critique (Bắt buộc)

(Viết một đoạn văn 200 - 300 chữ) [Nhận xét của bạn: AI đã làm sai, có định kiến hay thiếu sót ở đâu? Tại sao AI không phát hiện ra? Bạn đã học được nguyên tắc hợp tác nào với AI qua bài tập này?] [13]

5. Mandatory Disclosure (Bắt buộc)

(Giữ nguyên đoạn mẫu này và điền thông tin của bạn vào ngoặc vuông) "Các tài nguyên [Tên các artifacts ví dụ: Test cases / script / dataset / mindmap] was initially generated by [Tên công cụ AI]; I reviewed and modified [phần bạn đã sửa], added [các edge cases Y, Z bạn tự nghĩ ra]; [phần kiến thức bạn tự làm] was written entirely by me. The detailed AI Audit Report is attached as Appendix A. I confirm I did not use AI to generate any artifact listed in the prohibited category below." [13, 14]

6. Self-Assessment (Tự đánh giá)

(Điền điểm bạn tự chấm cho bài làm của mình dựa trên Rubric môn học. Tổng điểm phải là 1 con số có 3 chữ số từ 000 đến 100) [5, 12, 15]

No.	Criteria	Grade	Self-Assessed Grade
1	Job Market 2026+ (10 jobs x 3 pts + AI Impact)	40	[Điểm tự chấm]
2	Software Defects 2022-2026 (20 defects)	20	[Điểm tự chấm]
3	Physical-product test design (15 TCs + 5 videos)	25	[Điểm tự chấm]
AI-1	[AI-02] AI Audit Report (5-section) attached	8	[Điểm tự chấm]
AI-2	AI Critique 200-300 words + [AI-03] Disclosure attached	4	[Điểm tự chấm]
AI-3	[AI-05] Checklist signed + anti-cheat artifacts	3	[Điểm tự chấm]
Total		100	[Tổng điểm tự chấm: ví dụ 095]

Appendix A: AI Audit Report

(Sử dụng mẫu AI-02 để ghi chú cho mỗi artifact (tài nguyên) do AI tạo ra. Một lần yêu cầu AI sinh ra 15 test cases tính là 1 artifact) [17, 18]

Artifact 1: [Ví dụ: Bảng 15 Test Cases]

- Prompt + tool:** [Toàn bộ câu lệnh bạn đã dùng] - Công cụ: [Tên AI] - Thời gian: [HH:MM dd/mm/yyyy] [18]
- AI output:** [Chèn ảnh chụp màn hình viền đỏ hoặc dán toàn bộ text AI sinh ra, không tóm tắt] [18]
- Verdict:** [VALID / INVALID / INCOMPLETE] [18]
- Reasoning:** [2-5 câu giải thích vì sao bạn đánh giá như trên, dẫn chứng slide bài giảng hoặc ISTQB] [18]
- Student fix:** [Kết quả sau khi bạn đã chỉnh sửa lại, NHỚ HIGHLIGHT phần bạn đã thay đổi] [18]

(Lặp lại 5 mục trên cho các artifact khác như mindmap, code...)

Tổng kết:

- Tỷ lệ: [X]% VALID, [Y]% INVALID, [Z]% INCOMPLETE [13].

- Khi nào nên và không nên dùng AI cho công việc QA/QC: [...] [13]
